

The American Iron and Steel Institute

(AISI) serves as the voice of the North American steel industry in the public policy arena to advance the case for steel in the marketplace and as the preferred material of choice.

AISI is comprised of 19 member companies, including integrated and electric furnace steelmakers, and approximately 125 associate and affiliate members who are suppliers to or customers of the steel industry.

The steel industry directly employs about 140,000 people in the United States, and it directly or indirectly supports nearly one million U.S. jobs.
